

Recycling and the Wind makes a Mess

Tips on How to Avoid Issues From the Wind

EXCESS RECYCLING:

1. Do not overfill recycling bin.
2. Put excess recycling material in clear plastic bags or cardboard boxes with the top securely closed.
3. Please clearly label extra box or extra container as "RECYCLING".

PROPER PACKAGING WITHIN THE RECYCLING BIN:

4. Place recycling in a paper bag. Roll down the top of the bag to secure material.
5. Stack heavier rolled down paper bags on top of others to secure the material inside the bin.
6. Place bundled and tied newspapers on top of the material inside the bin.
7. Flatten cardboard boxes. Place the bin on top of the flattened boxes.
